EDUCATION

Mathematics Baccalaureate, *Lycée Pilote Jendouba*
– Graduated with highest honors (18.2/20)

INSAT - Industrial Computer Science and Automation

ESPRIT - AI Engineering Student   Present
First-year engineering student

SKILLS

Full-stack Development
django, expressjs, angular, springboot, react, symfony, flask

Deep Learning
Computer Vision, LLMs, VLMs, Pytorch, Langchain, Langgraph

Machine Learning
Sklearn, Pandas, Web Scraping

Programming Languages
Python, Java, C++, JS, PHP, ASSEMBLY, C

LANGUAGES

English
Fluent

French
Fluent

Arabic
Native

RECENT PROJECTS

HACKATON WINNER - 3rd PLACE: Advanced CHATBOT with RAG implementation
- Developped a chatbot for new IHEC students to help them adapt to their environment.
- Technologies used: LLMs, Ollama, Flask

Repair Cost Estimation and Analysis From an Image (car or house)
- Damaged cars and houses analysis and report for insurance companies by analyzing image and estimating cost according to current market prices.
- Technologies used: VLMs, Ollama, Flask, Angular

Psychology Expert AI AGENT
- Specialized AI Agent to diagnose patients with mental health issues
- Technologies used: LLMs, Langgraph, Langchain

Customer Support Mailing and SMS Automation
- Automated personalized mailing and sms system to respond to customers complaints
- Technologies used: LLMs, n8n

CERTIFICATES

Fundamentals of Deep Learning
Nvidia

Data Manipulation with pandas
datacamp
